Work

Front-end Engineering
Gilt.com - New York, NY (June 2011 - October 2015)
- Build various Node.js applications for internal prototyping and administration
- Build and maintained the front-end for customer facing applications using Play Framework, Backbone.js, Handlebars.js, RequireJS, Lesscss, and internal tools
- Taught an 8 week internal course on HTML and CSS to promote communication between designers and engineers
- Gave internal talks on Websockets, CSS techniques, Whiskey tasting, and knot tying

Part-time Faculty (Instructor, Parsons)
The New School - New York, NY (January 2013 - May 2013)

Front-end Developer
Blue World, Inc - New York, NY (October 2009 - May 2011)

Scannable list of technologies I've used (in no particular order)
JavaScript, CSS, Node.js, Gulp, Grunt, RequireJs, npm, Lesscss, React, Backbone, Karma, PhantomJs, Jasmine, Mocha, Github, git, zsh, bash, Handlebars, Hogan, Bower

My favorite tools
Sublime Text, iTerm, Google Chrome Canary, Kaleidoscope, and git

School

Bachelor of Arts, Computer Science
Harding University, Searcy, Arkansas 2003

For Fun

Selected Side Projects
SocketWrench | Rainbow Barf | Penumbra
